

RIFLESCOPE

PO 3-10X40 SM

The riflescope Zenit PO 3-10x40 SM is intended for using a rifle of caliber up to .338. It is designed specially for "Tiger" type of rifles. The leader in its line, this product is of premium class for reasonable price. The scope is endowed with tried-and-true functions including the first focal plane, parallax adjustment and reticle illumination. High quality optics with variable magnification from 3 to 10 allows to shoot without using tactical goggles. The design developed according to Russian standards can withstand the load of the toughest hunting calibers. Tactical elevation and windage turrets are made for ammunition of caliber .308, one turn of the turret equals installation at 800m. The scope can be completed with ballistic turret of adjustment and one-piece-mount with different angles of inclination

Specifications:

Magnification	3 – 10
Lens diameter, mm	40
Field of view	7°30' – 2°30'
Exit pupil, mm	9,8 – 4
Eye relief, mm	70
Eyepiece adjustment, dptr	±3
Elevation adjustment, mil	- 6 ... +13
Windage adjustment, mil	±6,5
Click value, mil	0,1
Parallax adjustment, m	from 25 to ∞
Dimensions, mm	325 x 61 x 75
Tube diameter, mm	30
Weight, kg	0,8
Battery type	CR 2032, 3v
